

Digital Storytelling Module Designs: Pedagogical Script for DST4

DST4 Digital Production

1-2 ECTS (25-60 hours)

Learning objectives and outcomes

The module and its assignments help students to

- practice (hands-on) digital content generation, creation, and finalization
- work together with peers to experiment with different digital tools and solutions.

With this module students will learn how to

- prepare for content generation
- plan and organize a shooting project together with peers and stakeholders
- collaborate with peers to learn to use content creation tools and editing software
- edit and finalize digital products in line with project goals and target audience needs.

Assignments
